

# KitchenAid Cold Brew Coffee Maker 5KCM4212SX

- **Makes cold brew coffee or tea concentrate at home by slow steeping in cold water for 12-24 hours**  
Produces a rich, smooth and balanced cold coffee, that is less acid and tastes less bitter than hot or iced coffee
- **Sleek, modern, built-in stainless steel tap**  
Allows you to easily dispense the cold brew concentrate from your refrigerator  
Easy to use, pour and clean
- **Aluminum carrying handle**  
Convenient and easy portability to enjoy the cold brew wherever you want
- **Reusable stainless steel steeper, labeled with fill level indicators**  
Brew versatility and customization
- **Modern, compact design with small footprint, glass and stainless steel components**  
Easy to clean and ideal fit for any refrigerator or countertop  
Glass carafe designed for the taste and aroma you love

STAINLESS STEEL

# KitchenAid Cold Brew Coffee Maker 5KCM4212SX

## TECHNICAL DATA

Servings		14
Material body		glass and stainless steel components
Product dimensions	H x W x D	17.5 x 17.8 x 20.3 cm
Packaging dimensions	H x W x D	26.2 x 25.4 x 23.1 cm
Master pack dimensions	H x W x D	28.7 x 47.5 x 26.9 cm
Net weight		2.5 kg
Gross weight		2.9 kg
Master pack gross weight		6.4 kg
Master pack		2 units
Country of origin		China

## What is cold brew coffee?\*

Cold brewed coffee is slow-steeped in cold water to produce a smoother, balanced flavour.

Unlike iced coffee, which is hot coffee poured over ice, there is no heat applied during the cold brew method.

60 ml of concentrate should be combined with 180 ml cold water or milk. Add ice/sweeteners to taste.

It's recommended using 1:3 coffee to water/milk ratio (1 part coffee concentrate to 3 parts water or milk).

## STANDARD ACCESSORIES

### Brew jar including tap and carrying handle for portability

Makes roughly 840 ml of coffee concentrate.

Glass limits flavour transfer across beverage types.

Easy-pour tap, simply by twisting, allows you to dispense your concentrate and serve from inside your refrigerator.

Jar is made out of glass and tap out of stainless steel.

Trim band is made out of brushed stainless steel and handle out of aluminum.

### Steeper lid and outer lid

Stainless steel lid helps to keep the cold brew both fresh and clean.

### Stainless steel steeper and steeper handle

Super fine mesh reusable steeper is designed for a smoother cup. This stainless steel steeper limits flavour transfer across beverage types.

Labeled with fill level indicators to take the guesswork out of the brewing process.

\* Cold Brew Coffee Maker can also be used to make tea concentrate (+/- 960-1020 ml).  
Cold brewed tea is steeped in cold water over a period of 6-12 hours.
