What is French Press?

The French Press brew method uses pressure to force coffee to the bottom of a carafe after brewing, capturing the concentrated flavours. Coffee has natural oils that preserve and protect its natural flavours. French Press brewing produces a flavour profile which is rich, bold and has a full body.

OTHER FEATURES AND BENEFITS

Control panel and LCD-display

Determining precise ratio and brew time is simple with the integrated scale and timer.

Plunger assembly and stainless steel mesh filter with silicone seal

Composed out of 4 parts: the filter top, the rubber gasket, the mesh filter disc and the filter bottom.
