*Motor horsepower for the blender motor was measured using a dynamometer, a machine that laboratories routinely use to measure the mechanical power of motors. Our 1.5 peak horsepower (HP) motor reference reflects the horsepower output of the motor itself and not the Blender's horsepower output in the blender jar. As with any blender, the power output in the jar is not the same as the horsepower of the motor itself.

**Sold separately.

5KSB2048JGA

Square jar shape with enhanced inner ribs increase the turbulence and power inside the jar.

The raised inside corners force ingredients into the blending vortex and the beveled upper corners make pouring easy.

Designed and engineered to further optimize the blender's performance.

Single wall jar: marked capacity is 1.4 L.

Dishwasher-safe.

1.6 L BPA-free plastic, ribbed, single wall jar with vented, solid-seal lid and removable ingredient measuring cap

5KSB2056JPA

To blend larger batches easily.

Dishwasher-safe (bottom rack).

BPA-free tamper KSB4048TPR

Goes easily through the lid to help mix ingredients and provide ultimate control. For large or ultra-thick blends.

Made out of plastic and rubber.

Dishwasher-safe.

Many times there will be no need to use the tamper as the blender delivers excellent performance but it will provide the ultimate control over the blend.

When it comes to high-speed blending, there are instances where an air pocket is formed over the blade, causing the ingredients to bridge. The tamper allows to quickly intervene and push ingredients into the blending vortex, allowing the blend to continue to optimal consistency. Large quantities, ultra-thick blends without liquid such as nut butter, hummus and sorbet, may require more tamper interaction.
